

InfoObjects CASE STUDY

How InfoObjects Enabled Event Planning, Registration, Attendee Management, and Analytics Using **Generative AI**

OVERVIEW

InfoObjects Consulting, using Generative AI tools, helped a prominent corporate event management firm to overcome their challenges:

- Manual entity creation
- Content generation
- HTML/CSS customization

Leveraging Generative AI, InfoObjects developed "Event AI Companion", an innovative POC that addressed challenges and offered valuable benefits:

- Automate event entity creation
- Simplified content generation with suggested prompts
- Generated HTML/CSS effortlessly
- ChatGPT integration

Through thorough analysis and customization, InfoObjects tailored the solution to fit firm's specific needs, harnessing the power of Generative AI to streamline processes and enhance the corporate event management, while utilizing LLM, OpenAI APIs, and Streamlit for seamless user interaction, intent extraction, JSON conversion, and integration.

"InfoObjects AI integration expertise, using ChatGPT and Generative AI tools, has revolutionized our event management software. Their thorough analysis, customization, and use of LLM and OpenAI APIs have greatly improved our processes. Their professionalism, expertise, and collaboration have made them invaluable partners."

Vice President

Corporate Event Management

APPROACH

Automated Event Entity Creation

- Remove a lot of Navigations and Clicks
- Streamline Event Entity Creation with Suggested Prompts
- User Interaction Based Model

Content Generation

- Automated HTML/CSS Generation
- Intuitive Content Creation
- Customizing Websites and Forms
- Eliminated Manual Coding
- Reduced Manual Effort

Integrated ChatGPT

- Intelligent Virtual Assistant
- User Input and Relevant Suggestions
- Actions to Optimize

Technology Stack

- NLP technique
- Streamlit for User Interaction Model
- OpenAI API's (GPT-4)
- Python 3.6

RESULTS

78%

Faster Time-To-Market

71%

Reduced Errors

66%

Improved Efficiency

CONCLUSION

The implementation of the AI-based solution "Event AI Companion" had a significant impact on corporate event management processes.

It streamlined event automation, content generation, and design generation tasks, resulting in

- Enhanced efficiency
- Reduced errors
- Accelerated time-to-market

The integration of AI technologies, including the core integration of ChatGPT powered by the OPENAI API, played a vital role in providing an intelligent virtual assistant.

Overall, by successfully implementing the AI-based solution, the firm experienced substantial improvements in their event management operations, enabling them to deliver events faster, with higher productivity, and improved control over essential tasks.
